Progress Tracker

Two sides per student: what I can do, week by week

Dyslexia-friendly edition (Lexend, wider spacing).

Name (nickname is fine): _____ Date: _____

How to use it: after each session, read the week's "I can…" and check **one** box — **1** Just starting, **2** Getting there, **3** Got it, **4** Expert. Your teacher adds a note. You may come back later and check a higher box!

Wk	I can…	1 2 3 4	Teacher note
1	make save points with git and write a helpful commit message	☐☐☐☐	
2	write a class with `__init__`, attributes and methods	☐☐☐☐	
3	make a child class that inherits, overrides and uses `super()`	☐☐☐☐	

Wk	I can…	1 2 3 4	Teacher note
4	explain why binary search is faster than linear search	☐☐☐☐	
5	sort data and choose a stack or a queue for a job	☐☐☐☐	
6	use the Thonny debugger to find a bug	☐☐☐☐	
7	write a recursive function with a base case and use a 2D grid	☐☐☐☐	
8	clean data from a CSV file, count it and draw a chart	☐☐☐☐	
9	explain how a nearest-neighbor AI predicts and how it can be biased	☐☐☐☐	
10	design my project with classes (CRC cards or a class diagram)	☐☐☐☐	
11	test my project with 5+ pytest tests and write a README	☐☐☐☐	
12	present my project and explain a design decision	☐☐☐☐	
B1	race and compare algorithms by hand	☐☐☐☐	

Wk	I can…	1 2 3 4	Teacher note
B2	build a mini game quickly and commit often	☐☐☐☐	

My project milestones

☐ **M1 Pitch** (end of week 9): my idea and option (a/b/c). Date: _____

☐ **M2 Design + core classes** (week 10): CRC cards, first classes committed. Date: _____

☐ **M3 Features + 5 tests + playtest** (week 11, first half). Date: _____

☐ **M4 README + polish** (week 11, second half). Date: _____

☐ **Showcase** (week 12): I presented and explained a decision. Date: _____

Teacher's record

Placement quiz (/20)	**Path chosen**
Checkpoint (/20)	**Commits in project**
