Progress Tracker

One copy per student: what I can do, week by week

Dyslexia-friendly edition (Lexend, wider spacing).

Tip: How the tracker works

At the end of each session (2 minutes, during the Wrap-up), read the "I can…" lines with the student. The **student** checks how it went, and you add a sticker or a stamp. Checks are about **this week**: it is completely normal to check "Getting there" for a new idea, because it comes back later (look at the tags). Keep the trackers in a folder and bring them out at the showcase: students love seeing how far they have come.

Tag	Means	So…
I	Introduced: brand new this week	"Getting there" is great.
R	Revisited: we practice it again	Aim for "Got it".
E⁺	Extended: we go further with it	Try for "Expert".

Teacher note: Levels

Getting there: can do it with help or by copying an example. **Got it:** can do it alone. **Expert:** can do it alone, explain it, and use it in a new way. The formal snapshots are the week-6 checkpoint and the week-12 exit assessment (see the Teacher Guide); this tracker is the everyday picture.

My progress: weeks 1–6 (Scratch)

Nickname: _____

Week	I can…	How it went	Sticker
1	✔ I can give exact step-by-step instructions in the right order. ✔ I can make a sprite move when the green flag is clicked. sequence I algorithm I sprite, stage I	☐ Getting there ☐ Got it ☐ Expert	
2	✔ I can use a repeat loop to draw a shape with the pen. ✔ I can work out the turn: $360 \div$ number of sides. loops I costumes I angles I	☐ Getting there ☐ Got it ☐ Expert	
3	✔ I can start code with events (flag, keys). ✔ I can use if and if-else to make a sprite react. events I if I sequence R loops R	☐ Getting there ☐ Got it ☐ Expert	
4	✔ I can use a variable to keep score. ✔ I can use pick random for a surprise. variables I random I if R events R	☐ Getting there ☐ Got it ☐ Expert	

Week	I can…	How it went	Sticker
5	✔ I can send and receive broadcast messages. ✔ I can make a My Block with an input. broadcast **I** My Blocks **I** decomposition **I** variables R	☐ Getting there ☐ Got it ☐ Expert	
6	✔ I can find and fix bugs in a Scratch project. ✔ I can match Scratch blocks to Python lines. all Scratch ideas R Scratch to Python **I**	☐ Getting there ☐ Got it ☐ Expert	

My progress: weeks 7–12 (Python)

Nickname: _____

Week	I can…	How it went	Sticker
7	✔ I can write and run a turtle program in Thonny. ✔ I can find and fix typos and syntax errors. Python **I** print, comments **I** syntax errors **I** sequence R	☐ Getting there ☐ Got it ☐ Expert	
8	✔ I can repeat with a `for` loop and `range`. ✔ I can indent the lines that belong inside a loop. for/range **I** indentation **I** loops **E⁺** nested loop **I**	☐ Getting there ☐ Got it ☐ Expert	
9	✔ I can ask with `input` and change the answer to a number with `int`. ✔ I can choose with `if`, `elif` and `else`. input **I** comparisons **I** if/elif/else **E⁺** variables **E⁺**	☐ Getting there ☐ Got it ☐ Expert	
10	✔ I can make my own function with `def` and use it. ✔ I can use `random` in Python and plan my project. functions **I** My Blocks R random **E⁺** decomposition R	☐ Getting there ☐ Got it ☐ Expert	

Week	I can…	How it went	Sticker
11	✔ I can build my project in small steps and test it. ✔ I can give and use helpful feedback. small steps **I** all ideas R feedback R	☐ Getting there ☐ Got it ☐ Expert	
12	✔ I can show my project and explain my code. ✔ I can say what I want to learn next. explaining code **E+** reflection R	☐ Getting there ☐ Got it ☐ Expert	

My final project milestones

Nickname: _____ Project name: _____

Milestone	Done when…	Date	Sticker
M1 Plan end of week 10	My plan sheet has a sketch, my questions and my function, and my teacher said OK.		
M2 Core drawing week 11	My function draws my main thing in at least two places.		
M3 Surprise and polish week 11	All six ingredients work and a partner playtested it.		
M4 Showcase week 12	I ran my project for visitors and explained one part.		

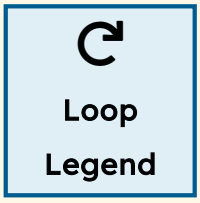

My badges

Your teacher gives a badge sticker (or a signature) when you earn it. Every badge can be earned by anyone, at any time.

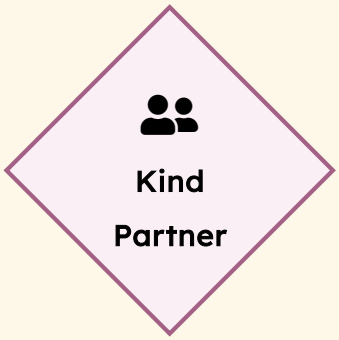

Found and fixed 5 bugs, and said how.

Date: _____

Used a loop inside a loop.

Date: _____

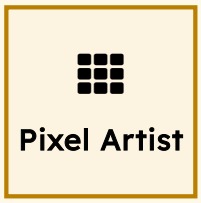

Great driver **and** navigator; gave kind feedback.

Date: _____

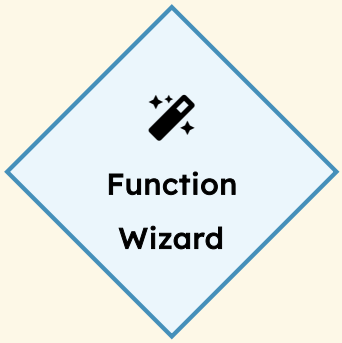

Chose a nickname and kept private things private.

Date: _____

Made a pixel picture on grid paper (B1).

Date: _____

Made a function with two or more inputs.

Date: _____

Remixed a project and gave credit.

Date: _____

Showed and explained my project.

Date: _____

Group overview (for the teacher)

One line per student. Write the band: **J** Just starting, **G** Getting there, **O** Got it, **X** Expert. Use the checkpoint and exit columns for the formal assessments; the week columns are your quick impression.

Nickname	1	2	3	4	5	6	Check-point	7	8	9	10	11	Exit	Project /20

Notes (support or extension ideas, things to celebrate):
