Progress Tracker

My Level 2 journey (one copy per student) and the group page (for the teacher)

Dyslexia-friendly edition (Lexend, wider spacing).

Tip: How to use it

Students: at the end of each session, check the "I can" statement if it is true, and color a star if you are proud of something. **Teacher:** fill in the group page (last page) in the last two minutes of the session: ✓ = got it, – = not yet, ? = check again next week. Use pencil: paths and levels change, and that is the point.

My Level 2 journey

Name (nickname is fine): _____ Date: _____

Wk	Session	I can…	Done	Proud
1	Welcome Back, Python	tell int, float, str and bool apart and build a message with an f-string.	☐	☆
2	Functions That Give Back	write a function that uses `return`.	☐	☆
3	Lists	make a list, add to it and loop over it.	☐	☆
4	While Loops	write a `while` loop that stops when something changes.	☐	☆
5	Dictionaries	look up and change values in a dictionary.	☐	☆
6	Review and Checkpoint	use a debugging strategy: traceback, print-debugging or rubber duck.	☐	☆
7	Files	save data to a file and load it again.	☐	☆
8	Testing	write a pytest test for a normal case and an edge case.	☐	☆
9	Event-Driven Games	make a turtle game react to keys and a timer.	☐	☆
10	Project Studio 1	plan my project and build its core loop.	☐	☆
11	Project Studio 2	test, playtest and improve my project.	☐	☆

Wk	Session	I can…	Done	Proud
12	Showcase	explain how my project works and why I built it that way.	☐	☆
B1	Cipher & Puzzle Day	encode and decode a secret message.	☐	☆
B2	Generative Art Jam	make art with lists, random and functions.	☐	☆

My skills

Color in the box that fits, once in week 6 and once in week 12. JS = Just starting, GT = Getting there, GI = Got it, EX = Expert.

	Week 6				Week 12			
I can…	JS	GT	GI	EX	JS	GT	GI	EX
use different types and f-strings (G1)	☐	☐	☐	☐	☐	☐	☐	☐
combine while loops, nested loops and `and`/`or` (G2)	☐	☐	☐	☐	☐	☐	☐	☐
write functions with parameters and `return` (G3)	☐	☐	☐	☐	☐	☐	☐	☐
use lists and dictionaries (G4)	☐	☐	☐	☐	☐	☐	☐	☐
save and load files (G5)					☐	☐	☐	☐

	Week 6				Week 12			
I can…	JS	GT	GI	EX	JS	GT	GI	EX
debug with a strategy and write tests (G6)	☐	☐	☐	☐	☐	☐	☐	☐
build games and art that react to keys and timers (G7)					☐	☐	☐	☐
plan, work in a team and use feedback (G8)	☐	☐	☐	☐	☐	☐	☐	☐
make safe, fair and private choices (G9)	☐	☐	☐	☐	☐	☐	☐	☐

My final project milestones

☐ **M1 Pitch and plan** (end of week 9): my idea, my pseudocode or flowchart, our task split.

☐ **M2 Core loop works** (week 10): the main thing happens on screen.

☐ **M3 Data and tests** (week 11, first half): list, dictionary, file and 3 tests.

☐ **M4 Polish** (week 11, second half): playtest feedback used, accessibility checked.

☐ **Showcase** (week 12): I showed it and explained one part.

Group page (teacher)

Write each student's nickname at the top of a column.

Student (nickname)				
Placement score / 14				
Path from week 1 (S / Std / Ext)				
Checkpoint score / 18 and level				
Path from week 7				
Exit score / 20 and level				
Project rubric / 16				

Weekly exit tickets and homework

✓ = got it – = not yet ? = check again. Two question marks in a row on the same idea: revisit it in the next warm-up.

Wk	Focus					Notes
1	types, f-strings					
2	return					

Wk	Focus					Notes
3	lists					
4	while					
5	dictionaries					
6	debugging					
7	files					
8	tests					
9	events					
10	M1, M2					
11	M3, M4					
12	showcase					
B1	ciphers					
B2	art jam					

Goals at week 6 and week 12

Write JS, GT, GI or EX in each box (week 6 / week 12).

Goal				
G1 types, f-strings	/	/	/	/
G2 control structures	/	/	/	/
G3 functions	/	/	/	/
G4 lists, dictionaries	/	/	/	/
G5 files	/	/	/	/
G6 debugging, tests	/	/	/	/
G7 events, games, art	/	/	/	/
G8 plan, team, feedback	/	/	/	/
G9 safe, fair, private	/	/	/	/
